

DESIGN TEAM

From the initial meeting with the client through occupancy of the space, our design team works with our clients to identify their design goals, scope of work, schedule requirements, and budgetary parameters.

Ultimately, through programming, space planning, and interior design, we develop a solution that is sensitive to the individual considerations of the project and reflects and advances our clients' missions. Working in partnership with our clients, we design not just for visual impact, but also for how it works, feels, and ease of use.

INTERIOR DESIGN

INTERIOR DESIGN

Well-designed interiors help organizations increase productivity and creativity.

flexible solutions for your business needs

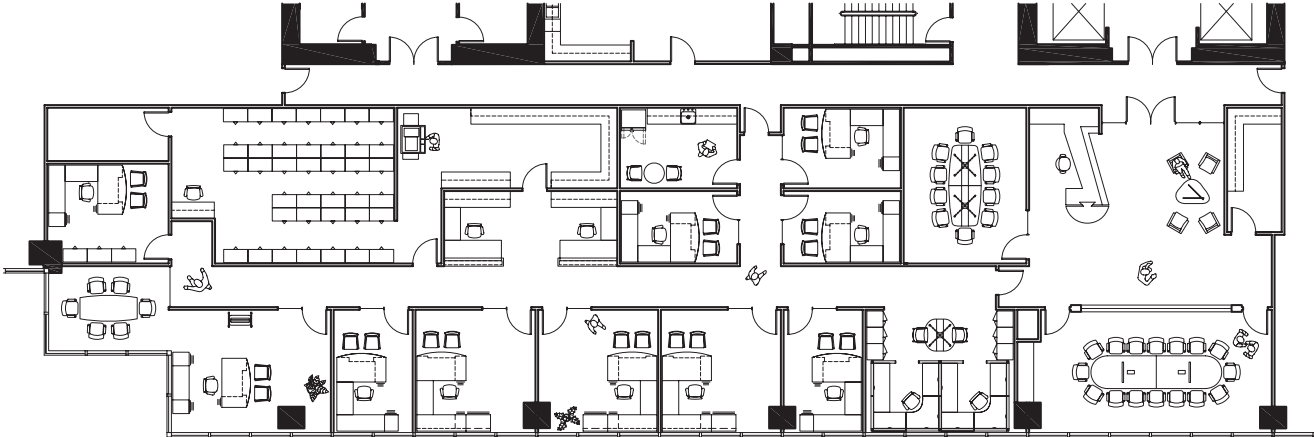

TENANT DEVELOPMENT

We deliver projects from the simplest space plan to the most multifaceted design solution. Our team understands the unique relationship that must be maintained between the building representative, the tenant, and the designer.

CORPORATE INTERIORS

In addition to the fast paced turn-around of tenant development, we can create more in depth and detailed interior design solutions to meet the client's corporate goals and requirements.

- Feasibility Studies
- Programming
- Test-fits
- Pricing Plans
- Construction Documents
- Engineering Services Coordination
- Material and Finish Selections
- Furniture Selection and Specifications
- Common Area Renovations
- Code Analysis
- TAS | ADA Compliance
- Project Management | Administration
- Move Management | Coordination

At Z PROJECTS, we believe that our design should continue to follow the path set by LEED by creating projects that not only heightens the human experience, but also impacts our environment in a positive way.

"OUR MISSION AT Z PROJECTS IS SIMPLE — TO PROVIDE EXCEPTIONAL SERVICES, WITH GOOD WILL, BY DOING WHAT'S RIGHT FOR OUR CUSTOMER."
